

## Part I: Create a Harvard E-mail Address

In order to use a Harvard MATLAB license, you will need to use a Harvard e-mail to create your Mathworks account. To do so, simply follow these instructions from Harvard University IT:

<http://huit.harvard.edu/pages/create-fas-account>

## Part II: Create a Mathworks Account

**Step 1: Go to mathworks.com.** In the top right corner click “login” then “create account”

**Step 2: Fill out the requested information.** Make sure to use your fas.harvard or g.harvard email account as that is the email address that can be linked to the Harvard license. Similarly, select *academic* use where it asks for your purpose. If you are not older than 13, lie. I don't know would happen otherwise.

A screenshot of the 'Create MathWorks Account' form. The form fields are:

- Email Address:** K0000@fas.harvard.edu (with a green checkmark and an arrow pointing to it labeled 'Harvard email!'). Below the field is the text 'You will need to verify your email address'.
- Country/Region:** United States (dropdown menu).
- How will you use MathWorks software?:** Academic use (including campus/site license use) (dropdown menu).
- Are you at least 13 years or older?:** Academic use (including campus/site license use) (radio button selected, with an arrow pointing to it labeled 'Academic use!'). Other options include 'Commercial use', 'Government use', and 'Student use of MATLAB® and Simulink® Student Version'.

At the bottom of the form are 'Cancel' and 'Create' buttons.

**Step 3: Verify your email address.** Mathworks has kindly chosen to explain this step.

### Verify your email address

1. Go to your inbox for [K0000@fas.harvard.edu](mailto:K0000@fas.harvard.edu). ← **Do this!** *but with your email*
2. Click the link in the email we sent you.

Didn't get the email?

1. Check your spam folder.
2. [Send me the email again.](#)
3. Contact [Customer Support](#) if you still do not have the email.

**Step 4: Complete your account.** Complete the form presented after you verify your email. If you would like to chat with fellow MATLAB users about MATLAB stuff, you can create a user ID, but it is unnecessary. To connect your account to Harvard's license, copy and paste the activation key: **11249-53799-90244-11277-47236** where it is requested in the "Associate Your Account to a License" box.

First Name	<input type="text" value="Kristian"/>	✓
Last Name	<input type="text" value="Herrera"/>	✓
User ID (Optional)	<input type="text" value="ksomethingg"/>	✓ ← (Optional)
<small>Must include 6 to 16 alphanumeric characters and start with a letter (Example: jsmith555) <a href="#">Learn more</a></small>		
Password	<input type="password" value="....."/>	✓
<small>Must be at least 8 characters, with at least one upper-case and one number</small>		
Password Confirmation	<input type="password" value="....."/>	✗ ← passwords should match
<small>Passwords do not match</small>		
Department	<input type="text" value="MCB"/>	✓ ← Or OEB, shouldn't matter

#### Associate Your Account to a License

If you have MATLAB already, enter your activation key or license number here. [What will this allow me to do?](#)

Activation Key or License Number (Optional)	<input type="text" value="10327-94247-35165-75093-18704"/>	✓ ← !! Use the key I gave you here!!
<small>Type 'ver' at the MATLAB prompt to get your license number or get an activation key from your MATLAB administrator.</small>		

I want a sales representative to contact me ← you don't

**Step 5 (optional): Associate your account a different way.** If you have already created your account, but haven't connected it to a license yet – do not lose hope! First, go to your “My Account” page by clicking your name in the top right hand corner of the screen (where login once was) and then click “My Account”

then click the leftmost box under “My Licenses” to associate with license.

And enter the activation key (11249-53799-90244-11277-47236) in the next screen.

**Step 6: Download MATLAB!** Once Mathworks has approved your license you can finally download MATLAB. Just go back to your account (click your name then “My Account”) and click the second box “Downloads” and you’ll be all set to download whichever version of MATLAB you like. If you’re computer runs on an older operating system, you may want to try and older version of MATLAB.

From here, follow the download and installation instructions. When you launch MATLAB for the first time, it will ask you to log in with your Mathworks account and enter an activation key- use the same account and activation key as before.

If you have trouble with any of these steps and want help from the instructors, we will be available after review session on Monday and lecture on Wednesday to assist you.
